

# Live Your Dreams

## Crafting an Effective Vision

*Start to live your dreams. Map your route – on your terms!*

An effective vision is clear, compelling and adds power to creative tension. It inspires, motivates and guides you as you move from current reality to where you want to be.

To craft an effective vision, ask yourself 3 questions:

1. What do I want? What is the end result you want to bring into being?
2. Why do I want to create this result?
  1. Does it support my higher values and aspirations?
  2. Is it something I love enough to want to create it for its own sake?
3. What would it look like if I successfully created it? See it as a completed result!
